**ER30001 "1968 INTERVIEW NUMBER"**

1968 Interview Number (1968 ID Number)

This variable is the 1968 family ID number. The combination of this variable and Person Number (ER30002) provides unique identification for each individual on the data file. Individuals associated with families from the Latino and Immigrant samples, added to the PSID in 1990/1992 and 1997/1999, and 2017 respectively, were assigned 1968 IDs so that they, too, have unique identifiers compatible with the PSID structure for the core (SRC and Census) sample.

<u>Value/Range</u>	<u>Code</u>	<u>Value/Range</u>	<u>Text</u>
1 - 2,930			Member of, or moved into, a family from the 1968 SRC cross-section sample
3,001 - 3,511			Member of, or moved into, a family from the Immigrant sample added in 1997 and 1999. Values of 3001-3441 indicate families first interviewed in 1997; values of 3442-3511 indicate families not interviewed until 1999.
4,001 - 4,851			Member of, or moved into, a family from the Immigrant sample added in 2017 and 2019. Values of 4001-4462 and (ER32052=2017) indicate families first interviewed in 2017; values of 4700-4851 indicate families not interviewed until 2019. Values of 4001-4462 and ER32052=2019 indicate the Multiplicity sample not interviewed until 2019
5,001 - 6,872			Member of, or moved into, a family from the 1968 Census sample
7,001 - 9,308			Member of, or moved into, a family from the Latino sample added in 1990 and 1992. Values of 7001-9043 indicate families first interviewed in 1990; values of 9044-9308 indicate families not interviewed until 1992.

<u>Value/Range</u>	<u>Code</u>	<u>Value/Range</u>	<u>Text</u>
1 - 19			Individuals living in core sample families at the time of the 1968 interview; individuals living in Latino sample families at the time of the 1990 (or 1992) interview; individuals living in Immigrant sample families at the time of the 1997 (or 1999) or 2017 (or 2019) interview
20			Husband of a core sample 1968 Head living in an institution at the time of the 1968 interview; spouse of a Latino sample 1990 Head living in an institution at the time of the 1990 interview; spouse of an Immigrant sample 1997/1999 or 2017/2019 Head/Reference Person living in an institution at the time of the 1997/1999 or 2017/2019 interview

- 21 - 26 Children or stepchildren of a 1968 core sample Head who were under 25 and living in institutions at the time of the 1968 interview; children of a Latino sample 1990 (or 1992) Head who were under 25 and living in institutions at the time of the 1990 (or 1992) interview; children of an Immigrant sample 1997 (or 1999) or 2017 (or 2019) Head/Reference Person who were under 25 and living in institutions at the time of the 1997 (or 1999) or 2017 (or 2019) interview
- 30 - 169 Individuals born into the core sample since the 1968 interview, the Latino sample since the 1990 (or 1992) interview, or the Immigrant sample since the 1997 (or 1999) or 2017 (or 2019) interview and who have at least one sample parent; these persons are sample members
- 170 - 226 Individuals who moved into a core family for the first time after the 1968 interview or who have no sample parent; individuals from the Latino sample, other than the spouse of a 1990 (or 1992) Head, who moved out in the year preceding the 1990 (or 1992) interview or who moved in for the first time after the 1990 (or 1992) interview; individuals from the 97 Immigrant sample, other than the spouse of a 1997 (or 1999), who moved out in the year preceding the 1997 (or 1999) interview or who moved in for the first time after the 1997 (or 1999) interview; individuals from the 17 Immigrant sample, other than the spouse of a 2017 (or 2019) Head/Reference Person, who moved out in the year preceding the 2017 (or 2019) interview or who moved in for the first time after the 2017 (or 2019) interview.

These individuals are nonsample unless they were born after the initial wave and have at least one sample parent.

- 227 Spouse of a core sample 1968 Head who moved out in the year prior to the 1968 interview; spouse of a Latino sample 1990 Head who moved out in the year preceding the 1990 (or 1992) interview; spouse of an Immigrant sample 1997 (or 1999) Head who moved out in the year preceding the 1997 (or 1999) interview. Spouse of an Immigrant sample 2017 (or 2019) Reference Person who moved out in the year preceding the 2017 (or 2019) interview. These individuals are nonsample.

- 228 Spouse of a core sample 1968 Head who died in the year prior to the 1968 interview; spouse of a Latino sample 1990 (or 1992) Head who died in the year prior to the 1990 (or 1992) interview; spouse of an Immigrant sample 1997 (or 1999) Head who died in the year prior to the 1997 (or 1999) interview; spouse of an Immigrant sample 2017 (or 2019) Reference Person who died in the year prior to the 2017 (or 2019) interview. These individuals are nonsample.
- 229 - 399 Individuals who moved into a core family for the first time after the 1968 interview or who have no sample parent; individuals from the Latino sample, other than the spouse of a 1990 (or 1992) Head, who moved out in the year preceding the 1990 (or 1992) interview or who moved in for the first time after the 1990 (or 1992) interview; individuals from the 97 Immigrant sample, other than the spouse of a 1997 (or 1999) Head, who moved out in the year preceding the 1997 (or 1999) interview or who moved in for the first time after the 1997 (or 1999) interview; individuals from the 17 Immigrant sample, other than the spouse of a 2017 (or 2019) Reference Person, who moved out in the year preceding the 2017 (or 2019) interview or who moved in for the first time after the 2017 (or 2019) interview.

These individuals are nonsample unless they were born after the initial wave and have at least one sample parent. This series is simply a continuation of the 170-226 group.

#### ER31987 "WHETHER IN US IN 1968"

Whether This Individual was in the U.S. in 1968, Imputed

This variable was created from the 1990 data collected in ER30672-ER30676 and the 1993 variables ER30765-ER30769. The set of questions was asked about individuals from the Latino sample in order to determine whether they had a chance of being selected for the core sample, an issue in the creation of the 1990-1992 combined core-Latino weights (1990 ER30688, 1991 ER30732 and 1992 ER30805). Cases with missing data on ER30672-ER30676 or ER30765-ER30769 were imputed proportionally. The proportions were based on the distribution within each Latino subgroup, using only cases with nonmissing data. This variable was updated for individuals not present in the previous year who moved into the study in 1991 and 1992. This is a nonissue for nonsample movers-in, but a few Latino sample individuals had "appeared" after 1990; that is, they had been in the 1990 family but their existence was not discovered until 1991 or later. If such persons were born since 1968 and information about their parents was available, then that information was used to assign codes here. If, however, they were already living by 1968, it was necessary to impute as mentioned above. Children born into the sample after 1990 received values based on their parents' information if known; if parental data regarding whereabouts in 1968 was missing, then values here were imputed.

Value/Range	Code Value/Range Text
1	Yes, this individual (or at least one parent, if individual was born in 1968 or later) was in the U.S. in 1968 and thus was eligible for the core sample
5	No, this individual (or neither parent, if individual was born in 1968 or later) was not in the U.S. in 1968 and thus was ineligible for the core sample
0	Individual from core or Immigrant sample (ER30001=1-2930, 3001-3511, 4001-4851, 5001-6872); Latino nonsample individual (ER30001=7001-9308 and ER30002=170-228); Latino sample individual who first appeared in the study after 1993 (ER30001=7001-9308 and ER30862=09)

**ER31988 "ETHNICITY ELIGIBILITY FOR LNPS"**

Latino National Political Survey Eligibility: Reported Ethnicity within LNPS Sampling Area

This variable was used in the creation of the 1990-1993 combined core-Latino weights (1990 ER30688, 1991 ER30732, 1992 ER30805, and 1993 ER30866). If the individual is core, it indicates whether the family to which this individual belonged in 1990 had a chance of inclusion in the LNPS because of ethnic affiliation of any family member living in an LNPS sampling area. If the individual was not in the study in 1990 but subsequently moved in, the indicator for the family into which he or she moved was assigned. For Latino sample individuals, the values indicate the ethnic affiliation of the family member who served as the respondent for the LNPS. This variable indicates the actual ethnic affiliation of persons, not the ethnic designation of their area of residence. Thus, a Mexican-American living in Miami (a Cuban-American LNPS sampling area) still receives a value of 1 for this variable. For further information about the LNPS sample design, see Section I, Part 13, of the 1990 Documentation. Both sample and nonsample members have values here. Unfortunately, after the 1968-1993 individual data were released we discovered that values for all Latino cases were missing from the file. These cases were filled with zeroes.

**ER31989 "ETHNICITY OF LNPS SAMPLING AREA"**

Latino National Political Survey Eligibility: Ethnic Designation of LNPS Sampling Area

This variable was used in the creation of the 1990-1993 combined core-Latino weight (1990 ER30688, 1991 ER30732, 1992 ER30805, and 1993 ER30866) to indicate in which, if any, of the three LNPS sampling areas the individual lived in 1989. This information was available for all Latinos, but data were missing for a few core cases. Those 1990 core cases missing information about state and county in 1989 were assigned 1990 location as a proxy. Similarly, some 1992 and 1993 core recontacts were also missing information from 1989. State and county data from 1992 and 1993 were used as proxies. See Section I, Part 5, of the guide to the 1993 family data, 93GUIDE.PDF, for details about the weights, and Section I, Part 13, of the 1990 Documentation for information about the LNPS sample design.

**ER31990 "MEXICAN LATINO STRATUM"**

Stratum Code--LATINO SAMPLE OF MEXICAN DESCENT

This is the stratum code required for complex variance estimation that takes the stratified multistage sample design into account. This variable and ER31991 are used to compute variance estimates when the analysis is restricted to the subset of the data from the geographic area in the original Latino sample design designated as predominantly Mexican-American. Codes range from 1 to 13. See Section I, Part 5, of the 1990 Documentation for a more detailed discussion of techniques for variance estimation using PSID data. This variable is available only at the individual level.

**ER31996 "SAMPLING ERROR STRATUM"**

## Sampling Error Stratum

This is the stratum code required for complex variance estimation that takes the stratified multistage sample design into account through the Taylor Series Linearization or Repeated Replication (Jackknife or Balanced Repeated Replication) methods. This variable and ER31997 are needed to correctly compute variance estimates for all types of PSID analyses. See the PSID technical document "Sampling Error Estimation in Design-based Analysis of the PSID" on the PSID website for details.

## Sampling Error Cluster

This variable defines pairs of units within each stratum (ER31996), and is needed for computing sampling errors using the Taylor Series Linearization or Repeated Replication (Jackknife or Balanced Repeated Replication) methods. This variable should be used in conjunction with ER31996. See the PSID technical document "Sampling Error Estimation in Design-based Analysis of the PSID" on the PSID website for details.

Whether Individual Has Always Been Present in a Responding Panel Family

This variable is generated by defining "always present" as follows:

CORE SAMPLE INDIVIDUALS whose sequence numbers for every year have been in the range 01-20 from 1969 through the present, whose person numbers are in the range 001-019, and whose relationships to Head in 1968 are in the range 01-09.

LATINO SAMPLE INDIVIDUALS whose sequence numbers from 1990 through 1995 were in the range 01-20. Individuals associated with Latino recontact families that were never interviewed until 1992 are included in code 3.

IMMIGRANT SAMPLE INDIVIDUALS from the 1997 sample addition whose sequence numbers from 1997 through the present were in the range 01-20; Immigrant sample individuals from the 1999 sample addition whose sequence numbers from 1999 through the present were in the range 01-20. Immigrant sample individuals from the 2017 sample addition whose sequence numbers from 2017 were in the range 01-20.

**ER32002 "WTR EVER CODED INSTITUTIONAL"**

Whether Individual Was Ever Institutionalized While Connected to a Responding Family

This variable is generated by selecting individuals whose sequence numbers have been in the range 51-59 in any year from 1969 through the present and/or whose person numbers are in the range 020-026 (thus indicating institutionalization in 1968 if core, 1990 if Latino, 1997/1999 if 97 Immigrant or 2017/2019 if 17 Immigrant). If such individuals had income during the portion of the year preceding their move out, this part-year income is included in the family-level data of the family whence they departed. In years following their institutionalization, no income questions were asked about them until they rejoined the family or split off.

**ER32003 "WTR ORIGINAL SAMPLE/BORN IN/MOVED IN"**

Whether Individual Was Born or Moved into the Panel Subsequent to the First Year of Interviewing

This variable is generated by selecting only those individuals whose person numbers are in the range 030-226, indicating birth or move in, or whose 1968 (for core--1968 ID number=0001-2930, 5001-6872), 1990 (for most Latinos--1968 ID number=7001-9043) or 1997/1999 for 97 Immigrants--1968 ID number=3001-3511 or 2017/2019 for 17 Immigrants--1968 ID number=4001-4851) data values contain only zeroes because, although in the family in that year, they were inadvertently omitted from the family listing. Such individuals were assigned original sample person numbers (001-019). These individuals may have appeared in the panel at any time subsequent to the initial year of interviewing (1968/1990/1997/1999/2017/2019). Individuals associated with Latino recontact families that were never interviewed until 1992 are included in code 4 below.

- 0 In 1968, this core individual was present or was a spouse who had died or moved out, and the data for 1968 are nonzero
- 1 This core individual was born or moved into a panel family after 1968 and therefore has zero data for 1968; subsequent years' data may also contain zeroes.
- 2 This core individual was missed in error in 1968, although an original sample member; 1968 and possibly subsequent data contain zeroes.
- 3 In 1990, this Latino individual was present, or was a spouse who had died or moved out; the data for 1990 are nonzero.
- 4 This Latino individual was born or moved into a panel family after 1990 and therefore has zero data for 1990; subsequent years' data may also contain zeroes. Latino recontacts (ER30001=9044-9308) are included here.
- 5 This Latino individual was missed in error in 1990, although an original sample member; 1990 and possibly subsequent data contain zeroes.
- 6 In 1997/1999, this 97/99 Immigrant individual was present, or was a spouse who had died or moved out; the data for 1997/1999 are nonzero.
- 7 This 97/99 Immigrant individual was born or moved into a panel family after 1997/1999 and therefore has zero data for that wave; subsequent years' data may also contain zeroes.
- 8 This 97/99 Immigrant individual was missed in error in 1997/1999, although an original sample member; the initial, and possibly subsequent, wave of data contains zeroes.
- 9 In 2017/2019, this 17/19 Immigrant individual was present, or was a spouse who had died or moved out; the data for 2017/2019 are nonzero.
- 10 This 17/19 Immigrant individual was born or moved into a panel family after 2017/2019 and therefore has zero data for that wave; subsequent years' data may also contain zeroes.
- 11 This 17/19 Immigrant individual was missed in error in 2017/2019, although an original sample member; the initial, and possibly subsequent, wave of data contains zeroes.
- 12 This individual was in an institution in 1968 if core, in 1990 if Latino, in 1997/1999 if 97/99 Immigrant, or 2017/2019 if 17/19 Immigrant, (ER30002=020-029)

#### ER32004 "WTR EVER MOVED OUT OF FU OR DIED"

Whether Individual Moved Out of a Responding Panel Family or Institution or is Deceased

This variable is generated by selecting individuals whose values for the Reason for Non-Response variables have ever been 41, including those with Sequence Numbers in the range 81-89 (mover-out deceased). Also included are those who moved out of a responding family or institution but did not join another in that same wave (mover-out non-response). Additionally, because Person Number (ER30002) was a proxy for Sequence Number in the 1968 wave, those core sample spouses who moved out or died in the year prior to that interview, i.e., whose person numbers equal 227 or 228, are included. Note the separate codes 2 and 3 for the mover-out deceased versus other deceased persons, respectively.

If any movers-out had income during the year preceding their move, this income is included in the family-level data of the family whence they departed for the portion of the year that they were resident in that family.

	1		This individual moved out of a responding main family or institution, was not included in another responding family in that wave, and has never been marked as deceased.
	2		This individual died while connected with a responding main family.
	3		This individual died but not while connected to a responding main family.

**ER32005 "WTR EVER OUT OF STUDY 1 YEAR OR MORE"**

Whether Individual Has Stayed Out of the Panel for a Year or More

This variable is generated by selecting core individuals with any year's ID number equaling zero from 1969 through the present. Main family nonresponse for the current year are included here, as well as nonresponse from other years. Mover-out nonresponse, however, must have moved out and stayed out for at least one wave, or died in a previous year in order to have any zero data at all on the file.

For Latino individuals, the yearly ID numbers were checked for zeroes from 1990 through 1995. Individuals associated with Latino recontact families that were never interviewed until 1992 are included in code 3. The ID numbers of 97/99 Immigrant individuals from the portion of the sample first interviewed in 1997 were checked from 1999 through the present; persons from the 1999 sample addition were checked from 2001 forward.

The ID numbers of 17/19 Immigrant individuals from the portion of the sample first interviewed in 2017 (ER30001=4001-4462) were checked through 2019. Persons from the 2019 sample addition (ER30001=4700-4851) will have a value of 6 as of 2019 wave (their year one interview).

#### ER32006 "WHETHER SAMPLE OR NONSAMPLE"

##### Whether Individual Is Sample

This variable not only indicates persons who were sample members but also flags nonsample members who were designated as followable. Thus far in PSID history, two such nonsample groups exist: nonsample elderly individuals, followed from 1990 through 1995, and nonsample parents of sample children if the children were under age 18, followed from 1994 through 2003.

Initially, the nonsample elderly have person numbers of 170 and higher and were aged 64 or older at the time of the 1989 interview and expected to be at least age 65 by the time of the 1990 interview. In each subsequent wave through 1995, a nonsample individual who was expected to be at least 65 years old by the time of the next interview was added to the group. Refer to Section I, Part 1, of the Guides to the 1990 and subsequent codebooks for further details.

Nonsample parents also have person numbers of 170 or greater. Initially, all such parents were designated in advance of the 1994 interview if any of their sample children were under age 18. These parents were followed until the youngest sample child reached age 25. As births of new sample members occurred from 1994 through 2003, their nonsample parent was made followable.

Beginning in 1994, children who were born since the initial interview for the sample to which they belonged and who carried the "PSID gene", that is, who had at least one sample parent but who did not move into a responding PSID family at birth, were designated moved-in sample members. Such children were assigned person numbers of 170 and higher but have individual weights for years when they are present in the PSID and otherwise fall under all PSID rules for sample members.

Some individuals whose cohort years are 1968, 1997 or 1999 and whose family met similar eligibility criteria to the immigrant refresher sample added in 2017/2019 became sample themselves as of 2019. Those individuals have a value of 4 on this variable.

#### ER32007 "YEAR OF MOST RECENT NONRESPONSE"

##### Most Recent Year of Nonresponse, Including Institutionalized Individuals

The most recent year of nonresponse is coded here. All individuals who are currently nonresponse have code values of 2017 here. Individuals who became nonresponse in 1972, for example, but returned to a responding FU in, say, 1990, have values of 1990 for this variable and values of 1972 for ER32008. The term "nonresponse" here includes those individuals who have moved to institutions, are not followed for interview, but who are tracked until the time when they set up their own households.

Note that values for main Latino sample individuals (ER30001=7001-9043) are only calculated for years when the Latino sample was active, that is, 1990 through 1995. Nonresponse individuals from the Latino recontact sample (ER30001=9044-9308) can have values in the range 1992-1995.

Similarly, values for 97 Immigrant sample individuals begin with 1997. Those from the 1999 sample addition (ER30001=3442-3511) begin at 1999.

Values for the 17 Immigrant sample (ER30001=4001-4462) individuals begin with 2017. Those from the 2019 sample addition (ER30001=4700-4851) begin at 2019.

**ER32008      "YEAR FIRST BECAME NONRESPONSE"**

First Year of Nonresponse, Including Institutionalized Individuals

The first year of nonresponse is coded here. In the case of main family nonresponse, this wave's data contain zeroes. For mover-out nonresponse, this wave's data contain some information, including part-year income data. The next wave's data contain zeroes unless, of course, the individual returned to a responding FU in that wave or remained in an institution. If the individual became nonresponse in the current wave, then the code value here equals that for the previous variable (ER32007).

The term "nonresponse" here includes those individuals who have moved to institutions, are not followed for interview, but who are tracked until the time when they set up their own households.

Note that values for main Latino sample individuals (ER30001=7001-9043) are only calculated for years when the Latino sample was active, that is, 1990 through 1995. Nonresponse individuals from the Latino recontact sample (ER30001=9044-9308) can have values in the range 1992-1995.

Similarly, values for 97 Immigrant sample individuals begin with 1997. Those from the 1999 sample addition (ER30001=3442-3511) begin at 1999.

Values for the 17 Immigrant sample individuals begin with 2017 (ER30001=4001-4462) . Those from the 2019 sample addition (ER30001=4700-4851) begin at 2019.

# **ER32009 "1968 ID OF MOTHER"**

1968 Interview Number (1968 ID Number) of Individual's Mother

The actual 1968 ID number (the family-level identifier which, when combined with person number, uniquely identifies an individual) of the individual's natural mother is coded. These data were coded for all children whose births were reported in the retrospective birth histories gathered about their mothers in waves 1985-2019. For a detailed description of the types of people about whom birth history information was gathered, see the 1985-2019 Childbirth and Adoption History File Documentation, Section I.

Additionally, individual identifiers linking mother and child were coded in other ways: mother's identifiers for all individuals in responding families in 1983 and 1984, for Heads and Spouse/Partners in the 1988 parent supplemental sequence, for children who received support from absent parents in 1997, for children with mothers in the FU in 1997-2011, and by PSID staff during family composition editing. The 1988 Time and Money Transfers data also yielded some information about children of Heads and Spouse/Partners, and the 1997 support supplement indicated children to whom support was given by a parent in the FU. More recently, the 2013 Rosters and Transfers data supplied information about children of Heads and Spouse/Partners. For further details see the documentation for the cumulative Parent Identification File, one of the PSID's family history files.

**ER32011 "YEAR MOTHER BORN"**

Year Individual's Mother was Born

The values for this variable indicate the year the mother was born, as reported in the 1985-2019 data collection effort, when this individual was mentioned as a child in the mother's birth history. For a detailed description of the types of people about whom birth history information was gathered, see the 1985-2019 Childbirth and Adoption History File Documentation, Section I.

**ER32012 "TOTAL # CHILDREN BORN TO MOTHER"**

Total Number of Children Born to this Individual's Mother

The values for this variable indicate the total number of children, including this individual, reported as born to the individual's mother. The value for each case is up to date as of the wave that contains the most recently collected birth history information for the mother. No further birth history information is collected for her after she reaches age 45, or if she becomes nonresponse. Since she could subsequently give birth, this variable may not reflect the total number of children ever born to her. For a detailed description of the types of people about whom birth history information was gathered, see the 1985-2019 Childbirth and Adoption History File Documentation, Section I.

**ER32013 "ORDER OF BIRTH TO MOTHER"**

Birth Order Ranking of Individual with Mother

This variable was generated from birthdate information collected in 1985-2019 as part of the mother's birth history data. If no birthdates contained missing data, then each child was rank-ordered from the earliest to the most recent date. If one or more birthdates contain missing data, then missing data are assigned to this variable for this individual. For a detailed description of the types of people about whom birth history information was gathered and the handling of multiple reports, see the 1985-2019 Childbirth and Adoption History File Documentation, Section I.

#### ER32014 "BIRTH WEIGHT OF THIS INDIVIDUAL"

##### Birth Weight of This Individual at Birth-TOTAL OUNCES

The values for this variable indicate the birth weight in ounces as collected in the 1985-2019 birth histories of this individual's mother or father. The questions for 1985 asked only whether the birth weight was under 5 1/2 pounds, but those from 1986 on asked the actual birth weight. For a detailed description of the types of people about whom birth history information was gathered and the handling of multiple reports, see the 1985-2019 Childbirth and Adoption History File Documentation, Section I. In 1985 when retrospective birth histories were collected, birth weights were asked about all children. However, in each wave from 1986 on, birth weight was asked only if the child had been born since January 1 of the prior calendar year. For individuals who were continuously in the study, this presents no problem because births were collected more or less as they happened, but when an individual is new to the study or returns after a period of nonresponse, birth weights for his or her older children are missing. This affects almost no born-in sample children and so should present minimal analytic obstruction.

#### ER32015 "MARITAL STATUS OF MOTHER AT BIRTH"

##### Marital Status of Mother at Time of Individual's Birth

This variable was created from marriage and birth history information pertaining to this individual's mother and collected during waves 1985-2019. It was constructed by comparing the mother's marriage history dates with this individual's birth date as reported in the mother's birth history. For a detailed description of the types of people about whom birth history information was gathered and the handling of multiple reports, see the 1985-2019 Childbirth and Adoption History File Documentation, Section I.

#### ER32016 "1968 ID OF FATHER"

1968 Interview Number (1968 ID Number) of Individual's Father

The actual 1968 ID number (the family-level identifier which, when combined with person number, uniquely identifies an individual) of the individual's natural father is coded. These data were taken from the father's retrospective birth history information gathered in 1985-2019. For a detailed description of the types of people about whom birth history information was gathered, see the 1985-2019 Childbirth and Adoption History File Documentation, Section I.

Additionally, individual identifiers linking father and child were coded in other ways: father's identifiers for Heads and Spouse/Partners in the 1988 parent supplemental sequence, for children who received support from absent parents in 1997, for children with fathers in the FU in 1997-2011, and by PSID staff during family composition editing. The 1988 Time and Money Transfers data also yielded some information about children of Heads and wives/"wives", and the 1997 support supplement indicated children outside the FU to whom support was given by a parent in the FU. More recently, the 2013 Rosters and Transfers data supplied information about children of Heads and Spouse/Partners. For further details see the documentation for the cumulative Parent Identification File, one of the PSID's family history files.

# **ER32018      "YEAR FATHER BORN"**

Year Individual's Father was Born

The values for this variable indicate the year the father was born, as reported in the 1985-2019 data collection effort, when this individual was mentioned as a child in the father's birth history. For a detailed description of the types of people about whom birth history information was gathered and the handling of multiple reports, see the 1985-2019 Childbirth and Adoption History File Documentation, Section I.

#### ER32019 "TOTAL # CHILDREN BORN TO FATHER"

Total Number of Children Born to this Individual's Father

The values for this variable indicate the total number of children, including this individual, reported as born to the individual's father. The value for each case is up to date as of the wave that contains the most recently collected birth history information for the father. No further birth history information is collected for the father if he is Head and his legal Wife, present in the FU, is past age 44, if he is an other FU member and is past age 44, or if he becomes nonresponse. Since births to the father could subsequently occur, this variable may not reflect the total number of children ever born to him. For a detailed description of the types of people about whom birth history information was gathered, see the 1985-2019 Childbirth and Adoption History File Documentation, Section I.

#### ER32020 "ORDER OF BIRTH TO FATHER"

Birth Order Ranking of Individual with Father

This variable was generated from birthdate information collected in 1985-2019 as part of the father's birth history data. If no birthdates contained missing data, then each child was rank-ordered from the earliest to the most recent date. If one or more birthdates contain missing data, then missing data are assigned to this variable for this individual. For a detailed description of the types of people about whom birth history information was gathered and the handling of multiple reports, see the 1985-2019 Childbirth and Adoption History File Documentation, Section I.

**ER32051 "YEAR MOST RECENT PREGNANCY INTENTION REC"**

Year of the most recent pregnancy intention record

Starting in 2013, for those individuals in responding FUs who were eligible for the Marriage and History Section of the questionnaire and reported a newborn child, they were eligible for a series of questions about future pregnancy intentions if they were also the respondent. We are providing this data as a new supplementary Family History file available from the PSID Data Center. Individuals may have multiple records across waves and this variable is the most recent year of any report.

<u>Value/Range</u>	<u>Code</u>	<u>Value/Range</u>	<u>Text</u>

**ER32052 "YEAR THIS INDIVIDUAL'S COHORT BEGAN"**

Year this individual's cohort began

The study has added several cohort refresher samples during the duration of the project including the Latino, the 1997/1999 Immigrant refresher and the 2017/2019 Immigrant refresher samples. This summary variable: YEAR THIS INDIVIDUAL'S COHORT BEGAN (ER32052) will indicate which year this individual's original family was first added to the study. In past waves, this was easily indicated by the range of the 68ID Interview Number (ER30001), however with the introduction of the Multiplicity sample in 2019 using the 68ID Interview Number alone is no longer sufficient.

The Multiplicity sample families are derived from the most recent Immigrant refresher sample added in 2017 (ER30001=4001-4462 and ER32052=2017). They are the adult parents, children, or sibling families who did not share the same Housing Unit as their nominator family and were screened as eligible and added to the study in 2019. Because these families (the 2017 Immigrant and the 2019 Multiplicity sample) are interconnected they must share the same 68ID Interview Number (ER30001=4001-4462) but YEAR THIS INDIVIDUAL'S COHORT BEGAN will equal 2019 (ER32052=2019) for the Multiplicity sample which indicates the year their original family first entered the study.

	0	Inap.: this individual does not have a Census Match record	

#### ER33401 "1997 INTERVIEW NUMBER"

1997 Interview Number (1997 ID Number)

The values for this variable represent the 1997 interview number of the family in which this individual was included in 1997. We interviewed 6,306 core families and 441 Immigrant sample families in 1997.

<u>Value/Range</u>	<u>Code</u>	<u>Value/Range</u>	<u>Text</u>
1 - 6,353		1997 core family interview number	
10,001 - 10,444		1997 Immigrant family interview number	
	0	This individual was main family nonresponse by 1997 or mover-out nonresponse by 1996; from Immigrant 99 recontact, Immigrant 17 or Latino samples (ER30001=3442-3511, 4001-4851, 7001-9308)	

#### ER33402 "SEQUENCE NUMBER

97"

1997 Sequence Number

This variable provides a means of identifying an individual's status with regard to the FU at the time of the 1997 interview.

Value/Range	Code	Value/Range	Text
1 - 20			Individuals in the family at the time of the 1997 interview
51 - 59			Individuals in institutions at the time of the 1997 interview
71 - 80			Individuals who moved out of the FU or out of institutions and established their own households between the 1996 and 1997 interviews
81 - 89			Individuals who were living in 1996 but died by the time of the 1997 interview
0			Inap.: born or moved in after the 1997 interview; from Immigrant or Latino samples (ER30001=3001-3511,4001-4851,7001-9308); main family nonresponse by 1997 or mover-out nonresponse by 1996 (ER33401=0)

**ER33403 "RELATION TO HEAD****97"**

## 1997 Relationship to Head

Note that these relationships are those to the 1996 Head for any individual whose 1997 sequence number (ER33402) is greater than 50, that is, has moved out of the FU. Thus, for example, if the 1996 Head is no longer present at the time of the 1997 interview, his or her relationship to Head is coded 10; the new 1997 Head also is coded 10. Therefore, to select current Heads, the user must select those coded 10 in this variable whose sequence numbers (ER33402=01).

Value/Range	Code	Value/Range	Text
10			Head in 1997; 1996 Head who was mover-out nonresponse by the time of the 1997 interview
20			Legal Wife in 1997; 1996 Wife who was mover-out nonresponse by the time of the 1997 interview
22			"Wife";--female cohabitor who has lived with Head for 12 months or more or who was present in the 1996 family, since consecutive interviews may be taken less or more than twelve months apart; 1996 "Wife"; who was mover-out nonresponse by the time of the 1997 interview
30			Son or daughter of Head (includes adopted children but not stepchildren)
33			Stepson or stepdaughter of Head (children of legal Wife (code 20) who are not children of Head)
35			Son or daughter of "Wife"; but not Head (includes only those children of mothers whose relationship to Head is 22 but who are not children of Head)
37			Son-in-law or daughter-in-law of Head (includes stepchildren-in-law)
38			Foster son or foster daughter, not legally adopted
40			Brother or sister of Head (includes step and half sisters and brothers)
47			Brother-in-law or sister-in-law of Head; i.e., brother or sister of legal Wife, or spouse of Head's brother or sister.

- 88 First-year cohabitor of Head
- 90 Legal husband of Head
- 95 Other relative of Head
- 96 Other relative of legal Wife (code 20)
- 97 Other relative of cohabitor (the cohabitor is code 22 or 88)
- 98 Other nonrelatives (includes homosexual partners, friends of children of the FU, etc.)
- 0 Inap. from Immigrant Sample added in 1999, from Immigrant Sample added in 2017 or Latino samples (ER30001=3442-3511, 4001-4851, 7001-9308); main family nonresponse by 1997 or mover-out nonresponse by 1996 (ER33401=0); born or moved in after the 1997 interview (ER33401>0 and ER33402=0)

**HHREL97      "PCG HOUSEHOLD FILE RELEASE NUMBER 97"**

Release number

For Release 3 we have added the PSID Main Study Identifiers Family Interview ID Number and Sequence Number for 1997.

The May 2019 release of the PCG-HH file includes one interview record per primary caregiver. This is a file structure change compared to previous releases, which included records from multiple interviews taken with the same primary caregiver. These multiple interviews occurred when one primary caregiver cared for children observed in two or more family units during the preceding PSID Core interview.

We used the following decision rules to retain one interview in the following priority order:

- a) Retain the PCG-HH record associated with the greatest number of children in a given PSID Core family unit.
- b) Retain the PCG-HH record corresponding to the family unit observed earlier in the PSID Core interview field period.
- c) Retain the PCG-HH record with the most non-missing data (Note: this was decided based on a case-by-case comparison).

**ER33803 "RELATION TO HEAD**

**05"**

2005 Relationship to Head

Note that these relationships are those to the 2003 Head for any individual whose 2005 sequence number (ER33802) is greater than 50, that is, has moved out of the FU. Thus, for example, if the 2003 Head is no longer present at the time of the 2005 interview, his or her relationship to Head is coded 10; the new 2005 Head also is coded 10. Therefore, to select current Heads, the user must select those coded 10 in this variable whose sequence numbers (ER33802) are coded 01.

**TA050001 "RELEASE NUMBER"**

## Release Number

Two variables have been reconfigured for Release 3: TA050947 COMPLETED EDUCATION OF MOTHER and TA050949 COMPLETED EDUCATION OF FATHER. We have assigned a discreet code value: 96 to represent either that the parent is unknown or they have never been in the study so there is no education information about them. Users may now identify parents who have 0 education from unknown parents or unknown education.

Release 4: K17C/K17F/K18C/K18F/K19C/K19F were recoded to a 1-digit code frame for public release, to protect anonymity. A 3-digit code frame is also available for these variables in separate files to qualified users under special contractual arrangements with the PSID; for more information, contact us at PSIDstaff@umich.edu.

Release 5: Suppression of Beale code for urbanicity (TA050953). Fixes to some variable labels for consistency across waves and across studies.

The values for this variable represent the 2013 interview number of the family in which this individual was included in 2013. We interviewed 9,063 families in 2013.

<u>Value/Range</u>	<u>Code</u>	<u>Value/Range</u>	<u>Text</u>
1 - 9,107		2013 family interview number	
0		Inap.: this individual was main family nonresponse by 2013 or mover-out nonresponse by 2011; from Latino sample (ER30001=7001-9308)	

**ER34202 "SEQUENCE NUMBER****13"**

## 2013 Sequence Number

This variable provides a means of identifying an individual's status with regard to the FU at the time of the 2013 interview.

<u>Value/Range</u>	<u>Code</u>	<u>Value/Range</u>	<u>Text</u>
1 - 20		Individuals in the family at the time of the 2013 interview	
51 - 59		Individuals in institutions at the time of the 2013 interview

## ER34203 "RELATION TO HEAD

13"

## 2013 Relationship to Head

Note that these relationships are those to the 2011 Head for any individual whose 2013 sequence number (ER34202) is greater than 50; that is, individual has moved out of the FU. Thus, for example, if the 2011 Head is no longer present at the time of the 2013 interview, his or her relationship to Head is coded 10; the new 2013 Head also is coded 10. Therefore, to select current Heads, the user must select those coded 10 in this variable whose sequence numbers (ER34202) are coded 01.
